AIML ENGINEER

Pre-final year B.Tech student in AI and Data Science with hands-on experience in Python, JavaScript, and R for machine learning and data analysis. Developed AI projects, including a learning organizer chatbot capable of generating study plans, multilingual responses, and structured notes from a single prompt. Experienced in exploratory data analysis, building and evaluating machine learning models, and creating data visualizations with real-world datasets during industry internships. Strong ability to translate complex technical problems into actionable AI/ML solutions, with a keen interest in applied Machine Learning, deep learning, and data-driven innovation.

WORK EXPERIENCE

GENZ EDUCATE WING (MSME APPROVED)

Machine Learning Virtual Intern

- Completed a hands-on Machine Learning internship using Python, working on real-world data and models.
- Built and evaluated ML workflows while staying consistently engaged throughout the internship period.
- Recognized for exceptional performance, curiosity, and active problem-solving during the program.

TATA CONSULTANCY SERVICES

Virtual Intern

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making

EDUCATION

B.Tech.Artificial Intelligence And Data Science

ANAND INSTITUTE OF HIGHER TECHNOLOGY • GPA: 8.83

CERTIFICATIONS

Data Analytics With Machine Learning

PROJECTS

NEXUS – STUDENT ASSISTANT

- Built a chatbot, which is a student assisted chatbot that creates notes , study schedules and also quizzes.
- Used machine learning, optical character recognition, Google Translate to scan PDFs and images while supporting multiple languages
- Integrated Groq for intelligence with React and JavaScript for interface

HEALTH GUARDIAN

- Engineered ML/Deep Learning models to predict diseases from user symptoms with high accuracy
- Implemented OCR technology to scan prescriptions and extract medication details automatically
- Built an AI chatbot for instant health recommendations and medical query resolution
- Developed an integrated platform combining disease prediction, prescription scanning, and health assistance

SKILLS

TECHNICAL SKILLS: Azure ML, Data Science, Data Structures And Algorithms, Data Visualization:Matplotlib, Java, JavaScript, Mongo DB, PowerBI, Python – Machine Learning, PyTorch, Seaborn, Structured Query Language (SQL), Tableau, TensorFlow
