PROFESSIONAL SUMMARY

Pre-final year B.Tech student in Artificial Intelligence and Data Science (CGPA: 8.83/10) with hands-on experience in machine learning, deep learning, LLM integration, OCR systems, data analytics, SQL/NoSQL databases, and end-to-end AI deployment. Built AI-driven chatbots and healthcare apps delivering 94% disease prediction accuracy and 30% faster response times.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

Machine Learning: scikit-learn, TensorFlow, PyTorch, LLM Integration, Feature Engineering, Model Evaluation

Data & Analytics: Pandas, NumPy, EDA, Matplotlib, Power BI

Databases & Tools: MongoDB, AWS, Azure ML, React, Git

PROJECTS

Nexus Student Assistant | LLM-Based Multilingual AI Chatbot | Oct-Dec 2024

- Engineered intelligent student assistant chatbot generating structured notes, personalized study schedules, and quizzes from a single prompt via LLM-based NLP techniques.
- Integrated OCR and Google Translate APIs to process PDFs/images in 15+ languages, attaining 98% text recognition accuracy.
- Leveraged Groq for high-speed inference and React/JavaScript UI, reducing response times by ~30% and boosting user satisfaction to 95% in testing.

Health Guardian | AI-Powered Disease Prediction & OCR-Based Healthcare Chatbot | Jan-Mar 2025

- Developed ML/DL models for disease prediction from symptom data, achieving 94% accuracy (from 80% baseline) via supervised learning and optimization on test datasets.
- Built OCR-NLP system to extract medication names, dosages, and frequencies from prescriptions, delivering 91% text recognition accuracy.
- Deployed integrated healthcare chatbot combining prediction, prescription scanning, and real-time guidance using LLM integration and end-to-end ML pipelines.

PROFESSIONAL EXPERIENCE

GENZ Educate Wing (MSME-Approved) | Aug 2025-Present

- Built end-to-end ML pipelines in Python (scikit-learn, Pandas, NumPy) for supervised classification/regression on real-world datasets, e.g., churn prediction and sales forecasting.
- Conducted data preprocessing, feature engineering, model training, cross-validation, and hyperparameter tuning; improved baseline accuracy by 18% (precision, recall, RMSE metrics).
- Recognized for analytical thinking and data-driven contributions to scalable ML solutions.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Anand Institute of Higher Technology | 2023-Present | CGPA: 8.83/10

CERTIFICATIONS

- Deploying SAP on Google Cloud – Google Cloud (2025)
- Gemini for Application Developers – Google Cloud (2025)
- Introduction to Responsible AI – Google Cloud (2025)
- Database Management System – MongoDB (2025)
- Fundamentals of Machine Learning and Artificial Intelligence – AWS (2025)
- Foundations of Prompt Engineering – AWS (2025)
- Data Analytics with Machine Learning – Deloitte (2026)
